- Machine Learning & Deep Learning
- Natural Language Processing (NLP)
- Digital Image Processing & Computer Vision
- Cybersecurity & Threat Intelligence
- Bio-Informatics / Nanomaterials

KEY PROJECTS

Biswas Shopping — Full-Stack E-Commerce Mobile & Web Application [GitHub]

2023

- Architected a cross-platform (Android / iOS / Web) e-commerce solution using Flutter, Firebase (Firestore, FCM, Auth) and GetX state management.
- Implemented real-time product catalogue, shopping cart, push notifications, and secure user authentication.

tion with seamless cloud synchronisation.

SafetyInsurance — Emergency Android Application [\[GitHub\]](#)

August 2023

- Built a safety-critical Android application enabling automatic and manual emergency SMS dispatch triggered via hardware volume-button press.
- Integrated GPS-based live location sharing to up to four pre-configured emergency contacts; developed natively in Java, XML, and Android Studio.
